Attention High School Chemistry Teachers!!!!

Do you need help with building a chemistry curriculum and interesting things to do in the classroom? Apply for a free one year membership to the American Association of Chemistry Teachers (AACT). ACS Hawaii Section will sponsor ten scholarships for interested teachers at disadvantaged schools throughout the islands. Email us and we will send you the application. The teacher should implement the curriculum from fall 2017-spring 2018. A short survey is asked of the awardees so we can assess if the curriculum was helpful.

What will AACT offer teachers of chemistry?
